Facilities Projects: This year we will be working on replacing the wind wall outside of the main entrance door and upgrading the ballasts in the church pendulum lights. The **wind wall** serves to block the severe wind gusts from blowing open and damaging the front door. The current structure has gotten to the point of needing replacing. For the past several weeks one of the **pendulum lights** close to the altar has been showing signs of failure. A part inside of the light was replaced, but that has not fixed the problem. In contact with the manufacturer of the fixture we were informed that they no longer produce the incandescent bulbs and therefore any replacements would have to be LED. To prevent greater issues and failure we have requested an estimate on ballast replacements. We plan to help fund these items by substituting, when possible, one of the second collection building funds each month with a Facility collection. Any extra donations are welcome and appreciated.
